FOR IMMEDIATE RELEASE

The Liberia Carbon Credit Development & Trading Company, Africa Environmental Watch and Interstellar M2M signed a global carbon footprint reduction agreement through an innovative tree planting initiative.

Monrovia, Liberia – September 19, 2024 – The Liberia Carbon Credit Development & Trading Corporation (LibCarbon), Africa Environmental Watch (AEW) and Interstellar Inc. D/B/A Interstellar M2M have announced a groundbreaking partnership to launch the Right Tree Program (RTP) in Liberia, a significant initiative aimed at combating global carbon emissions through strategic tree planting and conservation.

The agreement, signed recently, marks a critical step in leveraging natural solutions as a key component in climate change mitigation. The RTP allows individuals and organizations to commemorate loved ones and contribute to the fight against climate change by planting trees throughout Liberia. The “Right Trees Africa Program” involves the right nature-based solution to greenhouse gasses emission “by the people for the people”. The right trees for each geographic region are selected and planted based on their contribution to offsetting carbon emissions and benefits the local population.

Key Aspects of the Agreement:

Africa Environmental Watch (AEW) will spearhead the promotion and marketing of the trees. They will issue certificates of authentication to donors, providing precise coordinates and a unique number for each tree planted. This information will be accessible through a specialized virtual app, allowing donors to view their trees online.

Liberia Carbon Credit Development & Trading Corporation (LCCDTC) will manage the nursery, planting, and well-being of the trees. They will ensure that each tree is nurtured until it reaches at least three years of growth, contributing to a healthier environment. The establishment of the company was inspired by Chapter 8 of the National Forest Reform Law of 2006.

Interstellar M2M will provide for the digital geo mapping, location tagging, and monitoring of the trees. Their technology will ensure that each tree's location is accurately documented and tracked throughout the lifecycle of each tree.

Strategic Impact: This partnership aims to address climate change by increasing Liberia's forest cover and enhancing carbon sequestration efforts. The trees planted under the RTP will not only honor individuals but also contribute to sustainable environmental practices and Liberia's reforestation program.

Companies Information and Contacts for more details:

Liberia Carbon Credit Development and Trading Company: www.LibCarbon.com or info@libcarbon.com is a Liberia based company established in 2022 to actively participate in the forest conservation, preservation and reforestation offerings of Liberia. The company, in partnership with communities, private landowners and universities, aims to ensure that the national and international goals of climate mitigation are met using forest and trees resources.

Africa Environmental Watch: www.africaenvironmentalwatch.org or email info@africaenvironmentalwatch.com is an American non-profit organization established in 2004 to protect three fundamental engines of our environment: water, air and land, the essentials of life. AEW unit for global carbon footprint reduction through innovative tree planting initiatives will focus on this partnership. AEW is the host of 2024 Climate Justice and African Resilience Conference on November 9, 2024, in Maryland, USA.

Interstellar Inc., D/B/A Interstellar M2M: www.InterstellarM2M.com or email info@interstellarm2m.com is a service provider that provides customizable solutions combined with 3rd party integration for their clients. Trademarked as “Your Asset Fingerprint”, they came to this union by identifying the tree as the Asset. This connection falls within the division Green of the company which focuses on the environment and net zero greenhouse emissions by 2050.

Together, the Liberia Carbon Development and Trading Company, (an affiliate of Liberia Foundation for Climate Solution Inc.), Interstellar M2M, and Africa Environmental Watch are committed to making a meaningful impact on our planet’s health and climate resilience.

Signed: _____

Mr. Joseph P. Keller

Chairman

Board of Directors
